

## Recombinant Human BAZ1A protein, GST-tagged

**Cat. No.** BAZ1A-55H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                               |
|-------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human BAZ1A protein, fused with N-terminal GST tag was expressed in E.coli.                       |
| <b>Species</b>          | Human                                                                                                         |
| <b>Source</b>           | E.coli                                                                                                        |
| <b>ProteinLength</b>    | 1423-1544                                                                                                     |
| <b>Form</b>             | 50 mM Tris HCl, pH 7.5, 500 mM NaCl, 1 mM TCEP, 10% glycerol (v/v)                                            |
| <b>Molecular Mass</b>   | 41.1 kDa                                                                                                      |
| <b>Storage</b>          | Store at -80centigrade. Thaw quickly and store on ice before use. Avoid repeated freezing and thawing cycles. |

### GENE INFORMATION

|                        |                                                                                                                                                                                                                                  |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | BAZ1A bromodomain adjacent to zinc finger domain, 1A [ Homo sapiens ]                                                                                                                                                            |
| <b>Official Symbol</b> | BAZ1A                                                                                                                                                                                                                            |
| <b>Synonyms</b>        | BAZ1A; bromodomain adjacent to zinc finger domain, 1A; bromodomain adjacent to zinc finger domain protein 1A; ACF1; hACF1; WALp1; WCRF180; hWALp1; CHRAC subunit ACF1; ATP-dependent chromatin remodeling protein; ATP-dependent |

chromatin-remodeling protein; ATP-utilizing chromatin assembly and remodeling factor 1; williams syndrome transcription factor-related chromatin-remodeling factor 180; FLJ14383; DKFZp586E0518;

**Gene ID** [11177](#)

**mRNA Refseq** [NM\\_013448](#)

**Protein Refseq** [NP\\_038476](#)

**MIM** [605680](#)

**UniProt ID** [Q9NRL2](#)

**Chromosome  
Location** 14q13.2

**Function** NOT histone acetyltransferase activity; metal ion binding; protein binding; zinc ion binding;
