

Recombinant Human APOC3 protein, His/GST-tagged

Cat. No. APOC3-393H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human APOC3(Ser21~Ala99) fused with His/GST tag at N-terminal was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	Ser21~Ala99
Description	Apolipoprotein C-III is a very low density lipoprotein (VLDL) protein. APOC3 inhibits lipoprotein lipase and hepatic lipase; it is thought to delay catabolism of triglyceride-rich particles. The APOA1, APOC3 and APOA4 genes are closely linked in both rat and human genomes. The A-I and A-IV genes are transcribed from the same strand, while the A-1 and C-III genes are convergently transcribed. An increase in ap centigrade-III levels induces the development of hypertriglyceridemia.
