

## Recombinant Human BRWD1 protein, His-tagged

**Cat. No.** BRWD1-63H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                       |
|-------------------------|-------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human BRWD1 protein, fused with N-terminal His tag was expressed in E.coli.               |
| <b>Species</b>          | Human                                                                                                 |
| <b>Source</b>           | E.coli                                                                                                |
| <b>ProteinLength</b>    | 1310-1430                                                                                             |
| <b>Form</b>             | 50 mM Tris/HCl, pH 7.5, 500 mM NaCl, 1.0 mM TCEP, 10% glycerol (v/v).                                 |
| <b>Molecular Mass</b>   | 17.0 kDa                                                                                              |
| <b>Purity</b>           | >95% by SDS-PAGE                                                                                      |
| <b>Storage</b>          | Store at -80°C. Thaw quickly and store on ice before use. Avoid repeated freezing and thawing cycles. |

### GENE INFORMATION

|                        |                                                                      |
|------------------------|----------------------------------------------------------------------|
| <b>Gene Name</b>       | BRWD1 bromodomain and WD repeat domain containing 1 [ Homo sapiens ] |
| <b>Official Symbol</b> | BRWD1                                                                |
| <b>Synonyms</b>        | BRWD1; bromodomain and WD repeat domain containing 1; C21orf107,     |
