

Recombinant Human FHL3, His-tagged

Cat. No. FHL3-28894TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length protein [
Species	Human
Source	E.coli
Description	The protein encoded by this gene is a member of a family of proteins containing a four-and-a-half LIM domain, which is a highly conserved double zinc finger motif. The encoded protein has been shown to interact with the cancer developmental regulators SMAD2, SMAD3, and SMAD4, the skeletal muscle myogenesis protein MyoD, and the high-affinity IgE beta chain regulator MZF-1. This protein may be involved in tumor suppression, repression of MyoD expression, and repression of IgE receptor expression. Two transcript variants encoding different isoforms have been found for this gene.
