Mouse anti-BSA Monoclonal Antibody

Cat. No. CAB156 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	
Species	Bovine
Source	Mouse
Description	Bovine serum albumin (BSA) is used in variety of laboratories products which contain BSA as a stabilizer. BSA could be detected for the indication of remains of chemical derivates from animal products. This antibody is a good reagent that may be used for the development of detection assay in ELISA or western blot to test the remaning BSA for clinical products in Vivo or research products In Vitro.
Isotype	IgG1
Immunogen	Bovine serum albumin.
Application	Western Blot: Dilution 1: 300- 1000; ELISA: Propose dilution 1: 10000. Determining optimal working dilutions by titration test.
Formulation	Antibodies are purified by protein G affinity chromatography.
Storage	-20℃

GENE INFORMATION

Synonyms	serum albumin; Serum albumin; ALB
