

Recombinant Human GPX4, His-tagged

Cat. No. GPX4-29076TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human Glutathione Peroxidase 4 , fused at the C terminus to a His tag; MWt: ~20 kDa by SDS Page.
Species	Human
Source	E.coli
ProteinLength	197 amino acids
Description	Glutathione peroxidase catalyzes the reduction of hydrogen peroxide, organic hydroperoxide, and lipid peroxides by reduced glutathione and functions in the protection of cells against oxidative damage. Human plasma glutathione peroxidase has been shown to be a selenium-containing enzyme and the UGA codon is translated into a selenocysteine. Through alternative splicing and transcription initiation, rat produces proteins that localize to the nucleus, mitochondrion, and cytoplasm. In humans, experimental evidence for alternative splicing exists; alternative transcription initiation and the cleavage sites of the mitochondrial and nuclear transit peptides need to be experimentally verified.
Conjugation	HIS
Molecular Weight	20.000kDa inclusive of tags
Tissue specificity	Present primarily in testis.
