

Recombinant Human GRIK4

Cat. No. GRIK4-29879TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant fragment of Human KA1 with a N terminal proprietary tag: predicted molecular weight 37.73 kDa inclusive of tag.
Species	Human
Source	Wheat Germ
ProteinLength	110 amino acids
Description	This gene encodes a protein that belongs to the glutamate-gated ionic channel family. Glutamate functions as the major excitatory neurotransmitter in the central nervous system through activation of ligand-gated ion channels and G protein-coupled membrane receptors. The protein encoded by this gene forms functional heteromeric kainate-preferring ionic channels with the subunits encoded by related gene family members.
