

Recombinant Human Cyclin-Dependent Kinases Regulatory Subunit 2, T7-Tagged

Cat. No. CKS2-355H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant CKS2 fused with T7-tag was expressed in E.coli and purified by conventional chromatography techniques, 11.3kDa (94aa), 11.3kDa (94aa).
Species	Human
Source	E.coli
Description	Recombinant Human CKS2, also known as CDC28 Protein kinase 2 associates with the catalytic subunit of cyclin-dependent kinases and has therefore been assumed to play a direct role in cell cycle regulation. The function of CKS2 in somatic mammalian cells is not well understood although it is required for the first metaphase/anaphase transition during the meiosis. Emerging evidence shows that elevated expression of CKS2 protects the cells from apoptosis.
