

Native Human IL16

Cat. No. IL16-29736TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Synthetic peptide (Human)
Species	Human
Source	E.coli
Description	The protein encoded by this gene is a pleiotropic cytokine that functions as a chemoattractant, a modulator of T cell activation, and an inhibitor of HIV replication. The signaling process of this cytokine is mediated by CD4. The product of this gene undergoes proteolytic processing, which is found to yield two functional proteins. The cytokine function is exclusively attributed to the secreted C-terminal peptide, while the N-terminal product may play a role in cell cycle control. Caspase 3 is reported to be involved in the proteolytic processing of this protein. Alternate splicing results in multiple transcript variants.
Tissue specificity	Isoform 3 is expressed in hemopoietic tissues, such as resting T-cells, but is undetectable during active T cell proliferation.
Form	Lyophilised:Reconstitute with distilled water to achieve desired concentration.
Storage buffer	Preservative: NoneConstituents: 5mM Sodium citrate, 0.5mM DTT, pH 5.5
Storage	Store at +4°C short term (1-2 weeks). Aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.
