

alpha-Glucosidase Assay Kit

Cat. No. Kit-0062 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	alpha-Glucosidase Assay Kit is a colorimetric kinetic determination of α -Glucosidase activity.
Description	α -GLUCOSIDASE hydrolyzes the terminal, non-reducing 1,4-linked α -Dglucose residues with release of α -D-glucose. α -Glucosidase is needed by all animals to hydrolyze maltose to glucose for use as a food. Aberrant activities have been implicated in diseases such as diabetes and Pompe disease. Simple, direct and automation-ready procedures for measuring α -glucosidase activity are becoming popular in Research and Drug Discovery. alpha-Glucosidase Assay Kit is designed to measure α -glucosidase activity directly in biological samples without pretreatment. The improved method utilizes p-nitrophenyl- α -Dglucopyranoside that is hydrolyzed specifically by α -glucosidase into a yellow colored product (maximal absorbance at 405nm). The rate of the reaction is directly proportional to the enzyme activity.
Applications	Direct Assays: α -glucosidase activity in biological samples.Characterization and Quality Control for α -glucosidase production.Drug Discovery: high-throughput screen and evaluation of α -glucosidase inhibitors.
Usage	For research use only (RUO)
Storage	Store all reagents at -20°C. Shelf life: 6 months after receipt.
Kit Components	Assay Buffer: (pH 7.0) 24 mL α -NPG Substrate: 1 mLCalibrator: (equivalent to 250 U/L) 10 mL

 45-1 Ramsey Road, Shirley, NY 11967, USA

Detection method	Colorimetric
Compatible Sample Types	Biological Sample
Features & Benefits	High sensitivity and wide linear range: Use 20 μ sample. The detection limit is 2 U/L, linear up to 250 U/L. Homogeneous and simple procedure: Simple "mix-and-measure" procedure allows reliable quantitation of α -glucosidase activity within 20 minutes. Robust and amenable to HTS: All reagents are compatible with highthroughput liquid handling instruments.
