AKT total + Phospho S473 FLOW Kit

Cat. No. Kit-0065 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Akt is a serine, threonine protein kinase critical in cellular metabolism, glucose uptake, protein synthesis, cell proliferation, growth, apoptosis, survival, angiogenesis, migration and invasion. It acts downstream of the phosphatidylinositol 3 kinase (PI3K) and it mediates the effects of several growth factors such as platelet-derived growth factor, epidermal growth factor and insulin growth factor. It is activated by phosphorylation on Ser-473, Thr-308 and Tyr-474 and when active it phosphorylates transcription factors (FOXO1), kinases (GSK-3, Raf-1, ASK, Chk1) and other signaling proteins (Bad, MDM2). There are three Akt isoforms (Akt1, Akt2 and Akt3) which share 80% sequence identity also known as PKBα, PKBβ and PKBγ. Akt has been shown to have a role in metabolism, apoptosis and proliferation and therefore it has been proposed to be the candidate "Warburg Kinase".
Size	50 tests
Applications	Flow Cytmore details
Target Species	Reacts with: Mouse, Human
Storage	Store at +4°C.
Kit Components	Components: 50 tests; 10X Phosphate Buffered Saline: 1 x 100ml; 400X Tween-20: 1 x 4ml; 50X Antibody cocktail: 1 x 110µ Blocking Solution: 1 x 10ml
Detection method	Fluorescent

Tel: 1-631-559-9269 1-516-512-3133
Email: info@creative-biomart.com Fax: 1-631-938-8127
45-1 Ramsey Road, Shirley, NY 11967, USA

Compatible Sample Types	Adherent cells, Suspension cells
