

Antioxidant Assay Kit

Cat. No. Kit-0099 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Antioxidant Assay Kit is a quantitative colorimetric determination of total antioxidant capacity.
Description	An ANTIOXIDANT is a molecule capable of slowing or preventing the oxidation of other molecules. Antioxidants protect the cells from damages by reactive oxygen species which are produced in oxidation reactions in the cell. Antioxidants can be small molecules such as glutathione, vitamins, or macromolecules such as catalase, glutathione peroxidase. As oxidative stress contributes to the development of many diseases including Alzheimer"s disease, Parkinson"s disease, diabetes, rheumatoid arthritis and neurodegeneration, the use of antioxidants in pharmacology is intensively studied. Antioxidants are also widely used as dietary supplements and in industry as preservatives in food, cosmetics, rubber and gasoline.
Applications	Direct Assays: serum, plasma, urine, saliva and other biological samples, food and beverages. Drug Discovery/Pharmacology: effects of drugs on TAC.
Usage	For research use only (RUO)
Storage	Store Reagent A at room temperature and other components at -20°C. Shelf life of six months after receipt.
Kit Components	Reagent A 12 mL Reagent B 1 mL Standard: 50 mM Trolox 100 µ
Detection method	Colorimetric

 45-1 Ramsey Road, Shirley, NY 11967, USA

Compatible Sample Types

Beverage, Biological Sample, Food, Plasma, Serum, Saliva, Urine

Features & Benefits

Sensitive and accurate: Use 20 μ sample. Linear detection range from 1.5 to 1000 μ M Trolox equivalents. Simple and high-throughput: The procedure involves addition of a single working reagent and incubation for 10 min. Can be readily automated as a high-throughput assay for thousands of samples per day.
