Calcineurin Phosphatase assay Kit

Cat. No. Kit-0135 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Safe and non-radioactive assayConventient 1-step detection, no mixing neededHigh throughput with 96 well plate format
Size	96 wells
Description	This colorimetric kit is designed for inhibitor screening or kinetic assay of recombinant Calcineurin. Activity is determined using the RII phosphopeptide substrate, the most efficient and selective peptide known for calcineurin, and detection of free phosphate released is based on the classic malachite green assay.
Applications	Colorimetric detection, HTS
Storage	-80°C
Kit Components	Recombinant calcineurin, RII phosphopeptide substrate, calmodulin, assay buffer, BIOMOL GREEN detection reagent, phosphate standard, microplate and detailed instructions.
