

CAPN1 Inhibitor (Human) Screening Kit

Cat. No. Kit-0151 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CAPN1 Inhibitor (Human) Screening Kit is used for screening human CAPN1 inhibitor.
Description	Calpain 1 is calcium-dependent, non-lysosomal cysteine protease with low calcium requirement. It is expressed ubiquitously and in the brain, mainly localized to the cell body and dendrites of neurons and to a lesser extent in axons and glial cells. Hyperactivation of calpains is implicated in a number of pathologies associated with altered calcium homeostasis such as Alzheimer's disease as well as secondary degeneration resulting from acute cellular stress following cerebral (neuronal) ischemia, traumatic brain injury and spinal cord injury. CAPN1 Inhibitor (Human) Screening Kit is based on the detection of cleavage of calpain substrate Ac-LLY-AFC. Ac-LLY-AFC possess very weak fluorescence; upon cleavage of the substrate by calpain 1, free AFC can be quantified fluorometrically (Ex/Em = 400/505 nm). In the presence of potent Calpain 1 inhibitor, the hydrolyzation of substrate will be impeded. The kit provides a rapid, simple, sensitive, and reliable test suitable for high throughput screening of Calpain 1 inhibitors. Inhibitor control (Calpain inhibitor 1, ALLN) is included to compare the efficacy of test inhibitors.
Applications	Screening human Calpain 1 inhibitors
Target Species	Human
Usage	For research use only (RUO)

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Storage	Store kit at -80°C, protected from light. Warm Assay Buffer to room temperature before use. Briefly centrifuge all small vials before opening. Read the entire protocol before performing the assay.
Kit Components	Assay Buffer. Cap code: WM. 25 mlSubstrate. Cap code: red. 0.2 mlCalpain 1 Enzyme. Cap code: green. 0.2 mlInhibitor Control (Calpain Inhibitor 1, ALLN) [1 μ M]. Cap code: blue. 0.5 ml
Detection method	Fluorometric
