

Citrate Assay Kit II

Cat. No. Kit-0229 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Citrate Assay Kit is used for quantifying citrate.
Description	Citric acid ($\text{HOOC-CH}_2\text{-C}(\text{-OH})(\text{-COOH})\text{-CH}_2\text{-COOH}$) is a key intermediate in the TC A cycle which occurs in mitochondria. It is formed by the addition of oxaloacetate to the acetyl group of acetyl-CoA derived from the glycolytic pathway. Citrate can be transported out of mitochondria and converted back to acetyl CoA for fatty acid synthesis. Citrate is an allosteric modulator of both fatty acid synthesis (acetyl-CoA carboxylase) and glycolysis (phosphofructokinase). Citrate is widely used industrially in foods, beverages and pharmaceuticals. Citrate metabolism and disposition can vary widely due to sex, age and a variety of other factors. The Citrate Assay Kit provides a simple, sensitive and rapid means of quantifying citrate in a variety of samples. In the assay, citrate is converted to pyruvate via oxaloacetate. The pyruvate is quantified by converting a nearly colorless probe to an intensely colored ($\lambda_{\text{max}}=570 \text{ nm}$) and fluorescent (Ex/Em, 535/587 nm) product. The Citrate Assay Kit can detect 0.1 to 10 nmoles ($\sim 2 \text{ M-10 mM}$) of citrate in a variety of samples.
Target Species	Mammals
Usage	For research use only (RUO)
Storage	Store kit at -20°C , protect from light. Warm Citrate Assay Buffer to room temperature before use. Briefly centrifuge all small vials prior to opening.
Kit Components	Citrate Assay Buffer 25 mL Citrate Probe 0.2 mL Citrate Enzyme Mix: lyophilized. 1

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

	vialCitrates Developer: lyophilized. 1 vialCitrates Standard (10 µmol): lyophilized 1 vial
Detection method	Colorimetric, Fluorometric
Compatible Sample Types	Biological Fluid, Cell Culture Supernatant, Tissue Culture Supernatant, Urine
