

## Tumor-derived Exosome enrichment and Quantification Assay Kit (Biological Fluids/Cell Media, Colorimetric)

Cat. No. Kit-1024    Lot. No. (See product label)

### SPECIFICATION

#### Product Overview

|                                |                                                                                                                                                            |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>             | Tumor-derived Exosome enrichment and Quantification Assay Kit                                                                                              |
| <b>Applications</b>            | Tumor-derived exosome enrichment and quantification from Biological fluids                                                                                 |
| <b>Storage</b>                 | 4°C                                                                                                                                                        |
| <b>Shipping</b>                | Gel Pack                                                                                                                                                   |
| <b>Size</b>                    | 100 assays                                                                                                                                                 |
| <b>Kit Components</b>          | Sample buffer (1X); Washing buffer (25X); Primary Antibody; HRP conjugated; Substrate chromogenic solutions; Stop solution; Exosome Standards; Immunoplate |
| <b>Target Species</b>          | biological fluids/cell media                                                                                                                               |
| <b>Detection method</b>        | Colorimetric Assay                                                                                                                                         |
| <b>Features &amp; Benefits</b> | Double sandwich enzyme-linked immunoassay for quantitative and qualitative analysis of exosomes                                                            |
