

Hydrogen Peroxide/Peroxidase Fluorometric Detection Kit

Cat. No. Kit-0406 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	The Fluoro H ₂ O ₂ detection kit utilizes a non-fluorescent detection reagent to measure H ₂ O ₂ . H ₂ O ₂ oxidizes the detection reagent to produce a fluorescent product, resorufin which is catalyzed by peroxidase in a homogeneous no wash assay system. The detection reagent can be utilized to measure H ₂ O ₂ release from cells or enzyme coupled reactions.
Applications	Fluorescence plate reader
Usage	1. For Research use only. Not for use in diagnostic procedures. 2. Practice safe laboratory procedures by wearing protective clothing and eyewear. 3. The fluorescent product of the detection reagent is not stable in the presence of thiols (DTT or 2-mercaptoethanol). Keep these reactants below 10mM. If you are using your own buffer, keep the reaction between pH 7-8 (optimal pH 7.4). 4. NADH and glutathione (reduced form: GSH) may interfere with the assay. See Technical note 5.
Storage	1. Short term (several weeks): at 2-4°C and away from light. 2. Long term: see individual components. 3. Once a vial of the Detection reagent is opened, it should be used promptly since it is subject to oxidation by air.
Kit Components	Reagent-Storage Temperature 1. 5X Reaction Buffer: 20 ml buffer, pH 7.4, 2-8°C; 2. Detection reagent: One vial for 500 assays, 2-8°C; 3. Hydrogen Peroxide: 200μl of a stabilized 3% solution, 2-8°C; 4. Horseradish Peroxidase: 18.9 Units of enzyme, 2-8°C
Features & Benefits	1. Quick 10 minute assay. 2. Can monitor multiple time points to follow kinetics. 3. Dual
