

Ketone Body Assay Kit

Cat. No. Kit-0492 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Ketone Body Assay Kit is a quantitative colorimetric determination of ketone body at 340 nm.
Description	KETONE BODIES (acetoacetic acid and 3-hydroxybutyric acid) are produced in the liver mainly from oxidation of fatty acids, and are normally present at low concentrations in urine and blood. Increased ketone concentrations in the blood may lead to metabolic acidosis, which has been associated with diabetes, childhood hypoglycaemia, growth hormone deficiency, alcohol or salicylate intoxication and inborn errors of metabolism.
Applications	Direct assays of ketone body in serum, plasma, urine and other biological samples.
Usage	For research use only (RUO)
Storage	Store all reagents at -20°C. Shelf life: 6 months after receipt.
Kit Components	AcAc Buffer 20 mL AcAc Reagent (Dried) 1 vial AcAc Standard 200 µL HBDH Enzyme 120 µL BOH Buffer 20 mL BOH Reagent 1 mL BOH Standard 200 µL
Detection method	Colorimetric
Compatible Sample Types	Plasma, Serum
Features & Benefits	Sensitive and accurate: Uses 10 µL sample. Linear detection range of 0.12 to 8 mM

for each ketone body in 96-well plate assay. Convenient: The procedure involves adding a single working reagent, and reading the optical density at room temperature. High-throughput: Can be automated as a high-throughput 96-well plate assay for many samples per day.
