

Phospholipid Assay Kit (Colorimetric/Fluorometric)

Cat. No. Kit-0994 Lot. No. (See product label)

SPECIFICATION

Product Overview

Description

Phospholipids are a major component of lipid bilayer membranes. In addition, phospholipids are biologically important molecules as they are closely involved in signal transduction. Most phospholipids contain one diglyceride, a phosphate group, and one choline moiety. In human serum and plasma, almost 95% of the phospholipids are choline-containing phospholipids such as phosphatidylcholine and sphingomyelin. The remaining 5% is mainly choline-free phospholipids (i.e. phosphatidylethanolamine and phosphatidylserine). Phospholipid concentration is considered a disease biomarker as it can be altered in many lung, liver and heart diseases. phospholipid assay kit is simple, accurate and reproducible to measure total choline-containing phospholipids in biological samples such as serum, plasma and exosomes. The signal is directly proportional to the phospholipid concentration of phospholipids in the sample. This kit offers an excellent and efficient method for high-throughput assay that can detect phospholipid in the range of 0.1 to 10 nmol per sample.

Applications

Measures phospholipids in the range of 0.1 to 10 nmol per sample

Storage

-20°C

Shipping

Gel Pack

Size

100 assays

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Kit Components	Assay Buffer; Probe Solution; Hydrolysis Enzyme; Development Mix; Standard (10 μ mol)
Target Species	Mammalian
Detection method	Detection method- Absorbance (570 nm) or Fluorescence (Ex/Em 535/587 nm)
Features & Benefits	Simple procedure; takes less than ~40 minutes; Fast and convenient

 Tel: 1-631-559-9269 1-516-512-3133
