Matrix Metalloproteinase-1 (MMP-1) fluorometric drug discovery Kit

Cat. No. Kit-0568 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	A QuantiZyme Assay System. The MMP-1 Fluorometric (also known as fluorimetric) Drug Discovery Kit is a complete assay system designed to screen inhibitors of matrix metalloproteinase-1 (MMP-1, interstitial collagenase) using a quenched fluorogenic peptide: OMNIMMP fluorogenic substrate Mca-Pro-Leu-Gly-Leu-Dpa-Ala-Arg-NH. Mca fluorescence is quenched by the Dpa group until cleavage by MMPs at the Gly-Leu bond separates the two moieties. The assays are performed in a convenient 96-well microplate format. The kit is useful to screen inhibitors of MMP-1, a potential therapeutic target. Included are active enzyme, assay buffer, a prototypic control inhibitor (NNGH3), and a detailed instruction booklet.
Size	96 wells
Applications	Fluorescence microscopy, HTS
Storage	-80°C
Kit Components	MMP-1 enzyme, substrate, calibration standard, inhibitor, assay buffer, 96-well white microplate.
