

p70 S6K activity Kit

Cat. No. Kit-0643 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Safe-non-radioactive measurement of kinase activityFlexible-kinetic and end-point options availableFast-results in< 4.5 hoursEfficient-only 30 µL diluted sample needed per well
Size	96 wells
Description	The p70 S6K activity kit is an efficient assay that utilizes little sample volume. This kit gives you the ability to an end-point or kinetic assay read-out in a convenient 96-well plate based assay and offers easy sample handling protocols. The assay also offers a high signal to background ratio.
Applications	Colorimetric detection. For the measurement of p70 S6K activity in partially purified, purified, or crude enzyme preparations from any species.
Storage	Store all components at +4°C, except active kinase at -80°C.
Kit Components	Microtiter plate, Antibody, Conjugate, Antibody dilution buffer, Kinase assay dilution buffer, ATP, Active Kinase, Wash buffer concentrate, TMB Substrate, Stop solution 2
