

Trypsin Activity Assay Kit

Cat. No. Kit-0835 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Trypsin Activity Assay Kit is use for measuring trypsin activity using fluorometric methods.
Description	Trypsin (EC 3.4.21.4) is a serine protease found in the digestive system of many vertebrates, where it hydrolyses proteins. Trypsin is produced in the pancreas as the inactive proenzyme trypsinogen. Active trypsin predominantly cleaves peptide chains at the carboxyl side of the amino acids lysine or arginine, except when either is followed by proline. It is used for numerous biotechnological processes. In the assay, trypsin cleaves a substrate to generate p-nitroaniline (p-NA) which is detected at $\lambda=405\text{nm}$. Since the color intensity is proportional to p-NA content, trypsin activity can be accurately measured. The kit detects 10-100 mU (p-NA unit) trypsin in various samples.
Target Species	Mammals
Usage	For research use only (RUO)
Storage	Store the kit at -20°C .
Kit Components	Trypsin Assay Buffer 25 mL Trypsin Substrate (in DMSO) 200 μL Positive Control (Lyophilized) 1 vial p-NA Standard (2 mM) 400 μL Trypsin Inhibitor (TLCK, 20 mM) 100 μL Chymotrypsin Inhibitor (TPCK, 10 mM) 100 μL
Detection method	Colorimetric

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Compatible Sample Types	Biological Fluid, Cell Culture Supernatant, Plasma, Serum, Tissue Culture Supernatant, Urine
