

## Recombinant Dengue Virus Subtype 3 Envelope protein, His-tagged

**Cat. No.** Envelope 3-601D    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                               |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Dengue virus Subtype 3 Envelope, containing domains I+II of the dengue envelope, fused with His tag was expressed in E. coli.     |
| <b>Species</b>          | DENV                                                                                                                                          |
| <b>Source</b>           | E.coli                                                                                                                                        |
| <b>Form</b>             | Phosphate buffered saline, pH-7.4.                                                                                                            |
| <b>Molecular Mass</b>   | 32kDa                                                                                                                                         |
| <b>Purity</b>           | Protein is >95% pure as determined by 10% PAGE (coomassie staining).                                                                          |
| <b>Applications</b>     | Immunoassay.                                                                                                                                  |
| <b>Storage</b>          | Dengue Envelope-3 32kDa although stable at 4 centigrade for 1 week, should be stored below -18 centigrade. Please prevent freeze thaw cycles. |
