

## Recombinant Human GPIHBP1 Protein, Fc-tagged

**Cat. No.** GPIHBP1-674H    **Lot. No.** (See product label)

### SPECIFICATION

|                             |                                                                                                                                                           |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>     | Recombinant human GPIHBP1 (AAH63857.1) (Met1-Ser160) was expressed with the Fc region of human IgG1 at the C-terminus.                                    |
| <b>Species</b>              | Human                                                                                                                                                     |
| <b>Source</b>               | HEK293                                                                                                                                                    |
| <b>ProteinLength</b>        | 1-160 a.a.                                                                                                                                                |
| <b>Predicted N Terminal</b> | Gln 21                                                                                                                                                    |
| <b>Form</b>                 | Lyophilized from sterile PBS, pH 7.4, 5% ~ 8% trehalose and mannitol.                                                                                     |
| <b>Molecular Mass</b>       | The recombinant human GPIHBP1 consists 378 amino acids and predicts a molecular mass of 42.2 kDa.                                                         |
| <b>Endotoxin</b>            | < 1.0 EU per µg of the protein as determined by the LAL method.                                                                                           |
| <b>Purity</b>               | >95 % as determined by SDS-PAGE.                                                                                                                          |
| <b>Stability</b>            | Samples are stable for up to twelve months from date of receipt at -70°C.                                                                                 |
| <b>Storage</b>              | Store it under sterile conditions at -20°C~-70°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |

**Reconstitution**

It is recommended that sterile water be added to the vial to prepare a stock solution of 0.25 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.

**GENE INFORMATION**
**Gene Name**

GPIHBP1 glycosylphosphatidylinositol anchored high density lipoprotein binding protein 1 [ Homo sapiens ]

**Official Symbol**

GPIHBP1

**Synonyms**

GPIHBP1; glycosylphosphatidylinositol anchored high density lipoprotein binding protein 1; GPI anchored high density lipoprotein binding protein 1; glycosylphosphatidylinositol-anchored high density lipoprotein-binding protein 1; GPI HBP1; LOC338328; GPI-anchored HDL-binding protein 1; high density lipoprotein-binding protein 1; GPI-HBP1;

**Gene ID**

338328

**mRNA Refseq**

NM\_178172

**Protein Refseq**

NP\_835466

**MIM**

612757

**UniProt ID**

Q8IV16

**Chromosome  
Location**

8q24.3
