

Monoclonal Anti-Digoxin-FITC antibody, FITC conjugated

Cat. No. Digoxin-185 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Monoclonal Anti-Digoxin-FITC antibody produced in mouse, FITC conjugate. 3-8 mol fluorochrome per mol protein. Antibody is specific for digoxin and shows a high affinity for digoxigenin. Isotype: IgG1
Source	Mouse
Form	Supplied in 0.01 M phosphate buffered saline, pH 7.4, containing 1% BSA and 15 mM sodium azide as preservative.
Applications	Monoclonal Anti-Digoxin-FITC antibody is suitable for use in Fluorescence in situ hybridization. The product can also be used for dot immunobinding (at 1:16 dilutions using digoxigenin-labeled biomolecules).
Storage	Protect from light. For continuous use, store at 2-8 centigrade for up to one month. For extended storage, the solution may be frozen in working aliquots. Repeated freezing and thawing, or storage in "frost-free" freezers, is not recommended. If slight turbidity occurs upon prolonged storage, clarify the solution by centrifugation before use.
