

Recombinant H3N2 HA protein(Met1-Arg345), His-tagged

Cat. No. HA-666V **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Influenza A virus H3N2 (A/Brisbane/10/2007 (H3N2)) hemagglutinin (ABW23353.1) (Met 1-Arg 345), termed as HA1, was expressed in HEK293, fused with a polyhistidine tag at the C-terminus.
Species	H3N2
Source	HEK293
ProteinLength	1-345 a.a.
Form	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.
Molecular Mass	The recombinant HA1 subunit of Influenza A virus H3N2 (A/Brisbane/10/2007 (H3N2)) hemagglutinin comprises 340 amino acids with the predicted molecular mass of 38 kDa. As a result of glycosylation, it migrates as an approximately 60-65 kDa band in SDS-PAGE under reducing conditions.
Endotoxin	< 1.0 EU per µg of the protein as determined by the LAL method
Purity	> 97 % as determined by SDS-PAGE
Storage	Samples are stable for up to twelve months from date of receipt at -20°C to -80°C. Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

 45-1 Ramsey Road, Shirley, NY 11967, USA

Reconstitution

It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.
