

Recombinant Human MTPN, His-tagged

Cat. No. MTPN-28770TH Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human Myotrophin with a N terminal His tag. 138 amino acids with a predicted MWt 15 kDa including tag.
Species	Human
Source	E.coli
ProteinLength	118 amino acids
Description	The transcript produced from this gene is bi-cistronic and can encode both myotrophin and leucine zipper protein 6. The myotrophin protein is associated with cardiac hypertrophy, where it is involved in the conversion of NFkappa B p50-p65 heterodimers to p50-p50 and p65-p65 homodimers. This protein also has a potential function in cerebellar morphogenesis, and it may be involved in the differentiation of cerebellar neurons, particularly of granule cells. A cryptic ORF at the 3 end of this transcript uses a novel internal ribosome entry site and a non-AUG translation initiation codon to produce leucine zipper protein 6, a 6.4 kDa tumor antigen that is associated with myeloproliferative disease.
Conjugation	HIS
Molecular Weight	15.000kDa inclusive of tags
Tissue specificity	Ubiquitous.
