

Recombinant Human MYL4, His-tagged

Cat. No. MYL4-30265TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human MYL4 (amino acids 1-197) with a C terminal His tag; 205aa, 22.6kDa.
Species	Human
Source	E.coli
ProteinLength	197 amino acids
Description	Myosin is a hexameric ATPase cellular motor protein. It is composed of two myosin heavy chains, two nonphosphorylatable myosin alkali light chains, and two phosphorylatable myosin regulatory light chains. This gene encodes a myosin alkali light chain that is found in embryonic muscle and adult atria. Two alternatively spliced transcript variants encoding the same protein have been found for this gene.
