

Recombinant Human YWHAH protein

Cat. No. YWHAH-67H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human 14-3-3 eta was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
Description	14-3-3 eta also as known as YWHAH. This protein belong to the 14-3-3 family of proteins which mediate signal transduction by binding to phosphoserine-containing proteins. 14-3-3 eta interacts with and relocalizes the A20 zinc finger protein from the insoluble to the soluble fraction, suggesting a chaperone function. It implicated in the regulation of a large spectrum of both general and specialized signaling pathways. Binding to a large number of partners, usually by recognition of a phosphothreonine motif.
Form	Liquid. In Phosphate Buffered Saline (pH 7.4) containing 10% glycerol.
