Recombinant Human KAT2B protein, DDK-tagged

Cat. No. KAT2B-125H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human KAT2B fused with DDK tag at C-terminal was expressed in Wheat Germ.
Species	Human
Source	Insect Cells
Description	CBP and p300 are large nuclear proteins that bind to many sequence-specific factors involved in cell growth and/or differentiation, including c-jun and the adenoviral oncoprotein E1A. The protein encoded by this gene associates with p300/CBP. It has in vitro and in vivo binding activity with CBP and p300, and competes with E1A for binding sites in p300/CBP. It has histone acetyl transferase activity with core histones and nucleosome core particles, indicating that this protein plays a direct role in transcriptional regulation.
Form	50mM Tris-HCl pH8.0, 150mM NaCl, 20% glycerol.
Molecular Mass	93 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Storage	Store at -80 centigrade. Avoid repeated freeze-thaw cycles. Stable for at least 3 months from receipt of products under proper storage and handling conditions.
Concentration	>50 ug/mL as determined by microplate BCA method
