

Recombinant Mouse Pre-B-cell Colony-enhancing Factor 1, His-tagged

Cat. No. Nampt-157M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant mouse visfatin was expressed in E.coli and purified by using conventional chromatography techniques, 57 kDa (511 aa).
Species	Mouse
Source	E.coli
Description	Visfatin is predominantly secreted from visceral adipose tissue both in humans and mice. This protein has also been reported to be a cytokine (pre-B cell colony-enhancing factor, PBEF) that promotes B cell maturation and inhibits neutrophil apoptosis, or a visceral-fat derived hormone that acts by binding and activating the insulin receptor.
