

## Recombinant Human NSUN6 protein, MYC/DDK-tagged

**Cat. No.** NSUN6-1345H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human NSUN6 fused with MYC/DDK tag at C-terminal was expressed in HEK293. |
| <b>Species</b>          | Human                                                                                 |
| <b>Source</b>           | HEK293                                                                                |
| <b>Description</b>      | NSUN6 played an important role in many functions.                                     |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                 |
| <b>Molecular Mass</b>   | 51.6 kDa                                                                              |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                           |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                      |

### GENE INFORMATION

|                        |                                                                                                                                                    |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | NSUN6 NOP2/Sun domain family, member 6 [ Homo sapiens ]                                                                                            |
| <b>Official Symbol</b> | NSUN6                                                                                                                                              |
| <b>Synonyms</b>        | NSUN6; NOP2/Sun domain family, member 6; NOL1/NOP2/Sun domain family 6 , NOL1/NOP2/Sun domain family, member 6 , NOPD1; putative methyltransferase |
