

Active Recombinant Human PIK3R1/PIK3CD protein, His-tagged

Cat. No. PIK3R1&PIK3CD-157H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full-length human p110 delta and human p85 alpha were co-expressed by baculovirus in Sf9 insect cells using an N-terminal His tag on both proteins.
Species	Human
Source	Insect Cells
Description	PI3K (p110 delta/p85 alpha) is a member of the PI3K family that phosphorylates phosphoinositides on the 3-hydroxyl group of the inositol ring. PI3K (p110 delta/p85 alpha) plays a role in oncogenic transformation, and is consistently expressed at a high level in blast cells from AML. PI3K (p110 delta/p85 alpha) can play a selective role in the amplification of phosphatidylinositol (3,4,5) trisphosphate (PIP3) levels that lead to neutrophil polarization, and regulates directional migration, but not random locomotion. PI3K (p110 delta/p85 alpha) signaling pathway is involved in immune responses relevant to the pathogenesis of rheumatoid arthritis and other inflammatory diseases.
