

Active Influenza B (B/Victoria/504/00) Protein

Cat. No. Influenza B-1016I **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Allantoic fluid of 10 days old embryonated eggs, inoculated with influenza B virus, strain B/Victoria/504/00.
Species	Influenza B
Form	STE, 0.09 % sodium azide (NaN ₃) and 0.005 % thimerosal.
Bio-activity	Tested with anti-adenovirus antibodies in ELISA.
Purity	>90%
Characteristic	Virus was grown on monolayer of HeLa cells. When the cultures showed pronounced c.p.e. virus containing medium was purified from cell fragments by low speed centrifugation (4000 rpm, 40 min).
Applications	Serological studies of influenza B virus, immunogen for antibody production.
Notes	Thimerosal and beta propiolactone treatment. This product has been treated in a manner consistent with methods of inactivation. Generally accepted good laboratory practices appropriate to microbiological/viral safe handling practices and techniques are required at work.
Storage	Keep it at 4°C if used within a month. For long term storage, split it into small aliquots and keep at -80°C. Avoid repeated freezing and thawing. The product will be expired one year after receiving if stored properly. Non-hazardous.
