

Recombinant Human PDZD2 protein, His-tagged

Cat. No. PDZD2-33H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human PDZD2 fused with His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	The protein encoded by this gene contains six PDZ domains and shares sequence similarity with pro-interleukin-16 (pro-IL-16). Like pro-IL-16, the encoded protein localizes to the endoplasmic reticulum and is thought to be cleaved by a caspase to produce a secreted peptide containing two PDZ domains. In addition, this gene is upregulated in primary prostate tumors and may be involved in the early stages of prostate tumorigenesis.
Form	Tris-based buffer, 50% glycerol
Purity	>90% (SDS-PAGE)
Stability	Repeated freezing and thawing is not recommended. Store working aliquots at 4 centigrade for up to one week.
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20 centigrade/-80 centigrade. The shelf life of lyophilized form is 12 months at -20 centigrade/-80 centigrade.
