

Active Recombinant Human KMT2A protein, GST-tagged

Cat. No. KMT2A-189H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human KMT2A(3738-end) fused with GST tag at N-terminal was expressed in Insect cells.
Species	Human
Source	Insect Cells
ProteinLength	3738-end
Description	Histone-lysine N-methyltransferase 2A also known as mixed-lineage leukemia 1 (MLL1) methylates histone H3 on lysine 4 (H3K4) to promote genome accessibility and transcription. Dysregulation or mutation of the KMT2 family have been found in human cancer, exemplified by the initial discovery of KMT2A rearrangements as causes of MLL.
