

Native Parainfluenza Virus type 1(strain Sendai) Protein

Cat. No. HPIV1ag-276V **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Native Parainfluenza Virus type 1(strain Sendai) Protein was produced in Embryonated eggs.
Species	Parainfluenza Virus type 1
Source	Embryonated eggs
Purity	>90%, based on SDS PAGE.
Characteristic	Purification is conducted from broken yeast cells by following scheme: clarification, microfiltration, ultrafiltration, hydrophobic interaction chromatography, ion-exchange chromatography, ultracentrifugation, sterile filtration.
Applications	Serological studies of parainfluenza virus, immunogen for antibody production.
Stability	The product will be expired one year after receiving if stored properly.
Storage	Keep it at 4°C if used within a month. For long term storage, split it into small aliquots and keep at -80°C. Avoid repeated freezing and thawing.
Warning	For research use only, not for use in diagnostic procedures.
