

Recombinant Human NUF2, His-tagged

Cat. No. NUF2-30416TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant fragment, corresponding to amino acids 316-464 of Human Nuf2 with N terminal His tag; Predicted MWt 18 kDa.
Species	Human
Source	E.coli
ProteinLength	316-464 a.a.
Description	This gene encodes a protein that is highly similar to yeast Nuf2, a component of a conserved protein complex associated with the centromere. Yeast Nuf2 disappears from the centromere during meiotic prophase when centromeres lose their connection to the spindle pole body, and plays a regulatory role in chromosome segregation. The encoded protein is found to be associated with centromeres of mitotic HeLa cells, which suggests that this protein is a functional homolog of yeast Nuf2. Alternatively spliced transcript variants that encode the same protein have been described.
Conjugation	HIS
Form	Lyophilised:Reconstitute with 99 µl aqua dest.
