

## Recombinant HSV-1 gD Protein

Cat. No. gD-461V    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                    |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant HSV-1 gD Protein immunodominant regions (226-394aa), was produced in E. coli.                                                          |
| Species          | HSV1                                                                                                                                               |
| Source           | E.coli                                                                                                                                             |
| ProteinLength    | 226-394 a.a.                                                                                                                                       |
| Applications     | ELISA, WB, Flow-Through                                                                                                                            |
| Stability        | The product will be expired one year after receiving if stored properly.                                                                           |
| Storage          | Keep it at 4°C if used within a month. For long term storage, split it into small aliquots and keep at -80°C. Avoid repeated freezing and thawing. |
| Warning          | For research use only, not for use in diagnostic procedures.                                                                                       |
