

## Recombinant HSV-2 Protein, His-tagged

**Cat. No.** HSVag-498V    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                    |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant HSV-2 Protein, fused with His tag, was produced in E.coli.                                                                             |
| <b>Species</b>          | HSV2                                                                                                                                               |
| <b>Source</b>           | E.coli                                                                                                                                             |
| <b>Form</b>             | PBS (pH 6.0).                                                                                                                                      |
| <b>Molecular Mass</b>   | gp52                                                                                                                                               |
| <b>Purity</b>           | >80%, based on SDS PAGE.                                                                                                                           |
| <b>Characteristic</b>   | Ion column                                                                                                                                         |
| <b>Applications</b>     | ELISA, CLIA                                                                                                                                        |
| <b>Stability</b>        | The product will be expired one year after receiving if stored properly.                                                                           |
| <b>Storage</b>          | Keep it at 4°C if used within a month. For long term storage, split it into small aliquots and keep at -80°C. Avoid repeated freezing and thawing. |
| <b>Concentration</b>    | 0.1 - 1.0 mg/ml by Bradford method.                                                                                                                |
| <b>Warning</b>          | For research use only, not for use in diagnostic procedures.                                                                                       |
