

Recombinant Toxoplasma gondii p30 (SAG1) antigen, Tag Free

Cat. No. SAG1-890T Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Toxoplasma gondii p30 (SAG1) antigen without tag was expressed in E. coli.
Species	Toxoplasma gondii
Source	E.coli
ProteinLength	45-198 aa
Description	Toxoplasma gondii is an intracellular protozoan parasite of global importance that can remarkably infect, survive, and replicate in nearly all mammalian cells. Although most human infections with T. gondii are mild or asymptomatic, T. gondii infection can result in life-threatening disease in immunocompromised individuals and in the developing fetus due to congenital infection, underscoring the role of the host immune system in controlling the parasite. T. gondii manipulates host immunity through the control of host gene transcription and dysregulation of signaling pathways that result in modulation of cell adhesion and migration, secretion of immunoregulatory cytokines, production of microbicidal molecules, and apoptosis.
Purity	> 95% pure; Purity: of proteins is evaluated by SDS-PAGE
Applications	ELISA, WB
Comments	Immunoreactive with sera from Toxoplasma gondii infected individuals in ELISA and Western blot formats.

 45-1 Ramsey Road, Shirley, NY 11967, USA

Notes	The products are for laboratory research use or further manufacturing only and should not be used for human therapeutic or diagnostic applications.
Storage	Long Term: -80 centigrade Short Term: 4 centigrade (Three month or less)
Storage Buffer	1XPBS
Concentration	1 mg/mL; bulk amount available upon request
Shipping	Cold pack
GENE INFORMATION	
Synonyms	SAG1; p30; surface antigen 1
