

Recombinant Human Protein Phosphatase 1, Regulatory (Inhibitor) Subunit 14A, His-tagged

Cat. No. PPP1R14A-110H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant His tagged PPP1R14A was expressed in E.coli and purified by using conventional chromatography techniques (167 aa, 18 kDa).
Species	Human
Source	E.coli
Description	PPP1R14A (Protein phosphatase 1 regulatory subunit 14A) is a phosphorylation-dependent inhibitory protein for smooth muscle myosin phosphate. Myosin phosphatase can reverse MYL (myosin light chain) phosphorylation to induce a state of relaxation. However, during agonist-induced contraction at constant Ca ²⁺ concurrent inhibition of myosin phosphatase leads to increases in MYL phosphorylation and tension. These calcium-independent increases in myosin phosphorylation and tension are termed calcium sensitization.
Formulation	Liquid. In 20 mM Tris-HCl buffer (pH 8.0) containing 1 mM DTT, 2 mM EDTA, 10% glycerol.
Molecular Weight	18 kDa (167 aa).
Purity	> 95% by SDS – PAGE.
Concentration	1 mg/ml (determined by Bradford assay).
