

## Native Porcine Thyroglobulin (TG) Protein

Cat. No. TG-22P    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                                                |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Native Thyroglobulin (TG) Protein was purified from Sus scrofa (Porcine).                                                                                                      |
| Species          | Porcine                                                                                                                                                                        |
| Source           | Porcine                                                                                                                                                                        |
| Form             | Lyophilized from sterile PBS, pH7.4, containing 0.01% SKL, 1mM DTT, 5% Trehalose and Proclin300.                                                                               |
| Endotoxin        | < 1.0 EU per µg of the protein as determined by the LAL method.                                                                                                                |
| Purity           | > 97%                                                                                                                                                                          |
| Applications     | SDS-PAGE; WB; ELISA; IP.                                                                                                                                                       |
| Stability        | Samples are stable for up to twelve months from date of receipt at -70 centigrade.                                                                                             |
| Storage          | Store it under sterile conditions at -20 centigrade to -80 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| Reconstitution   | Reconstitute in PBS or others.                                                                                                                                                 |
| Shipping         | The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended.                                                              |
