

Recombinant Human ACE protein, His & GST-tagged

Cat. No. ACE-509H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human ACE (P12821) aa. (Arg814~Gln1071) fused with N-terminal His & GST tag was produced in E. coli cells.
Species	Human
Source	E.coli
ProteinLength	Arg814~Gln1071
Description	This gene encodes an enzyme involved in catalyzing the conversion of angiotensin I into a physiologically active peptide angiotensin II. Angiotensin II is a potent vasopressor and aldosterone-stimulating peptide that controls blood pressure and fluid-electrolyte balance. This enzyme plays a key role in the renin-angiotensin system. Many studies have associated the presence or absence of a 287 bp Alu repeat element in this gene with the levels of circulating enzyme or cardiovascular pathophysiologies. Multiple alternatively spliced transcript variants encoding different isoforms have been identified, and two most abundant spliced variants encode the somatic form and the testicular form, respectively, that are equally active.
Form	Freeze-dried powder
Molecular Mass	60kDa as determined by SDS-PAGE reducing conditions.
Endotoxin	<1.0EU per 1g (determined by the LAL method)

 45-1 Ramsey Road, Shirley, NY 11967, USA

Purity	> 95%
Characteristic	The isoelectric point is 5.9.
Applications	Positive Control; Immunogen; SDS-PAGE; WB
Stability	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Storage	Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.
Concentration	200µg/mL
Storage buffer	10mM PBS, pH7.4, containing 1mM DTT, 5% trehalose, 0.01% sarcosyl and Proclin300.
Reconstitution	Reconstitute in 10mM PBS (pH7.4) to a concentration of 0.1-1.0 mg/mL. Do not vortex.

GENE INFORMATION

Gene Name	ACE angiotensin I converting enzyme [Homo sapiens (human)]
Official Symbol	ACE
Synonyms	ACE; angiotensin I converting enzyme; DCP; ACE1; DCP1; CD143; angiotensin-converting enzyme; CD143 antigen; angiotensin I converting enzyme (peptidyl-dipeptidase A) 1; angiotensin converting enzyme, somatic isoform; carboxycathepsin;
