

Recombinant Human ADAM30 Protein, GST-tagged

Cat. No. ADAM30-286H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ADAM30 full-length ORF (AAH28372.1, 1 a.a. - 790 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a member of the ADAM (a disintegrin and metalloprotease domain) family. Members of this family are membrane-anchored proteins structurally related to snake venom disintegrins, and have been implicated in a variety of biological processes involving cell-cell and cell-matrix interactions, including fertilization, muscle development, and neurogenesis. This gene is testis-specific and contains a polymorphic region, resulting in isoforms with varying numbers of C-terminal repeats. [provided by RefSeq, Jul 2008]
Molecular Mass	113.3 kDa
