

## Recombinant Human ADCK5 Protein, GST-tagged

**Cat. No.** ADCK5-326H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                         |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human ADCK5 full-length ORF ( AAH31570, 1 a.a. - 169 a.a.) recombinant protein with GST-tag at N-terminal.                                                                                                                                                              |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                   |
| <b>Source</b>           | Wheat Germ                                                                                                                                                                                                                                                              |
| <b>Description</b>      | ADCK5 (AarF Domain Containing Kinase 5) is a Protein Coding gene. GO annotations related to this gene include transferase activity, transferring phosphorus-containing groups and protein serine/threonine kinase activity. An important paralog of this gene is ADCK1. |
| <b>Molecular Mass</b>   | 44.33 kDa                                                                                                                                                                                                                                                               |
| <b>AA Sequence</b>      | MRAHAAALGVQDYLLFAEMLMQRPVRLGQLWGSHELLSREEAAYMVDMARERFEAV<br>MAVLRELPRPMLLVLRNINTVRINVALGAPVDTRYFLMAKRAVRGWSRLAGATYRG<br>VYGTSLLRHAKVWWEMLKFEVALRLETLAMRLTALLARALVHLSLVPPAEELYQYLET                                                                                      |
| <b>Applications</b>     | Enzyme-linked Immunoabsorbent Assay<br>Western Blot (Recombinant protein)<br>Antibody Production<br>Protein Array                                                                                                                                                       |
| <b>Notes</b>            | Best use within three months from the date of receipt of this protein.                                                                                                                                                                                                  |

**Storage** Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

**Storage Buffer** 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

## GENE INFORMATION

**Gene Name** [ADCK5 aarF domain containing kinase 5 \[ Homo sapiens \]](#)

**Official Symbol** [ADCK5](#)

**Synonyms** ADCK5; aarF domain containing kinase 5; uncharacterized aarF domain-containing protein kinase 5; FLJ35454; MGC126708;

**Gene ID** [203054](#)

**mRNA Refseq** [NM\\_174922](#)

**Protein Refseq** [NP\\_777582](#)

**UniProt ID** [Q3MIX3](#)
