

## Recombinant Human EMC10 protein, HIS-tagged

Cat. No. EMC10-011H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                   |
|------------------|-----------------------------------------------------------------------------------|
| Product Overview | Recombinant Human EMC10 fused with His tag at N-terminal was expressed in E.coli. |
| Species          | Human                                                                             |
| Source           | E.coli                                                                            |
| ProteinLength    | 1-254 aa                                                                          |
| Form             | 25mM Tris, pH8.0, 150mM NaCl, 10% glycerol, 1 % Sarkosyl.                         |
| Molecular Mass   | 26.6 kDa                                                                          |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                       |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                  |

### GENE INFORMATION

|                 |                                                                       |
|-----------------|-----------------------------------------------------------------------|
| Gene Name       | EMC10 ER membrane protein complex subunit 10 [ Homo sapiens (human) ] |
| Official Symbol | EMC10                                                                 |
| Synonyms        | HSM1; HSS1; C19orf63; INM02; EMC10                                    |
