

Recombinant Human PPP1CC

Cat. No. PPP1CC-29101TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human PP1C gamma with N-terminal proprietary tag.Mol Wt 61.27 kDa inclusive of tag.
Species	Human
Source	Wheat Germ
ProteinLength	323 amino acids
Description	The protein encoded by this gene belongs to the protein phosphatase family, PP1 subfamily. PP1 is an ubiquitous serine/threonine phosphatase that regulates many cellular processes, including cell division. It is expressed in mammalian cells as three closely related isoforms, alpha, beta/delta and gamma, which have distinct localization patterns. This gene encodes the gamma isozyme. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
