

Recombinant Human PRF1

Cat. No. PRF1-29996TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant fragment of Human Perforin with proprietary tag, 36.08kDa.
Species	Human
Source	Wheat Germ
ProteinLength	95 amino acids
Description	The protein encoded by this gene has structural and functional similarities to complement component 9 (C9). Like C9, this protein creates transmembrane tubules and is capable of lysing non-specifically a variety of target cells. This protein is one of the main cytolytic proteins of cytolytic granules, and it is known to be a key effector molecule for T-cell- and natural killer-cell-mediated cytotoxicity. Defects in this gene cause familial hemophagocytic lymphohistiocytosis type 2 (HPLH2), a rare and lethal autosomal recessive disorder of early childhood. Alternative splicing results in multiple transcript variants encoding the same protein.
