

Recombinant Streptomyces Avidinii Streptavidin, His-tagged

Cat. No. Streptavidin-390S **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant His tagged streptavidin was expressed in E.coli and purified by using conventional chromatography techniques, 17 kDa (167 aa).
Species	Streptomyces avidinii
Source	E.coli
Description	Streptavidin, a tetrameric protein secreted by Streptomyces avidinii, binds tightly to a small growth factor biotin. It finds wide use in molecular biology through its extraordinarily strong affinity for the vitamin biotin; the dissociation constant (Kd) of the biotin-streptavidin complex is on the order of ~10 ⁻¹⁵ mol/L. The high affinity recognition of biotin and biotinylated molecules has made streptavidin one of the most important components in diagnostics and laboratory kits.

Formulation	Liquid. In 20 mM Tris-HCl buffer (pH 7.5)
Purity	> 95% by SDS - PAGE
Concentration	1 mg/ml (determined by Bradford assay)

 45-1 Ramsey Road, Shirley, NY 11967, USA

Storage

Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
